PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience building enterprise ERP and asset-management applications using C#, .NET, ASP.NET MVC, Web APIs, Entity Framework, and SQL. Skilled in API integration, database optimization, production troubleshooting, application security, and CI/CD using Jenkins and GitLab

TECHNICAL SKILLS

Languages & Backend: C#, .NET Framework, .NET Core, ASP.NET MVC, ASP.NET Core, Web API, Object-Oriented Programming (OOP), LINQ, async/await, dependency injection

API & Application Design: REST API design and integration, external-system integration, service-layer design, SOLID principles, design patterns, multi-tier architecture, JWT authentication, role-based access, CORS

Data & SQL: PostgreSQL, Microsoft SQL Server, MySQL, SQL queries, joins, stored procedures, stored functions, views, window functions, database design, query optimization, performance tuning

Frontend: HTML5, CSS3, JavaScript ES6+, jQuery, AJAX, React, Next.js 14, TypeScript, Bootstrap, MUI

Cloud & DevOps: Microsoft Azure, Azure App Service, Azure SQL, Application Insights, Git, GitLab CI/CD, Jenkins, IIS, Docker, CI/CD pipelines, deployment workflows

Tools & Reporting: Visual Studio 2017+, Postman, Crystal Reports, ClosedXML Excel import/export

PROFESSIONAL EXPERIENCE

Software Engineer (Full Stack) | Idea Infinity IT Solutions, Bengaluru, India **Jul 2023 - Sep 2026**

IIITS.ERP | Enterprise Resource Planning System

Tripura State Electricity Corporation Ltd. | C#, ASP.NET MVC, .NET Framework, Entity Framework, PostgreSQL, Crystal Reports, GitLab, Jenkins

- Developed and maintained MMS, FMS, and HRMS modules for a government ERP system supporting hundreds of users across Circle, Division, and Sub-Division levels
- Created and optimized PostgreSQL stored functions using DISTINCT ON and ROW_NUMBER() to correct inventory stock reporting across organizational locations
- Resolved a critical GST pricing defect caused by integer-division precision loss, restoring accurate financial calculations in procurement workflows
- Investigated a production security incident involving a malicious file upload and implemented extension allowlisting, MIME-type checks, and magic-byte validation
- Restored a Jenkins CI/CD pipeline by diagnosing an MSBuild and C# language-version compatibility issue, unblocking daily builds
- Implemented bulk Excel import/export using ClosedXML, including row-level validation errors and locale-safe data parsing
- Managed GitLab branching and supported migration from SVN to Git, recovering files affected by merge conflicts without data loss

i-AMS | Asset Management System

- Built and maintained a production asset-management application with end-to-end ownership across frontend and API integration
- Implemented role-based workflows and JWT authentication across multi-level user-role hierarchies
- Resolved Docker OOMKilled failures in CI/CD by using the production start command instead of the development server
- Reduced local development compile time from 11–53 seconds to under 3 seconds by removing static NextAuth imports and centralizing session/token logic
- Diagnosed authentication failures caused by mismatched frontend and backend token expiry, and improved configuration security by moving secrets to environment variables and rotating compromised JWT keys

ACHIEVEMENTS

- Recognized as the Module Lead for the Material Management System, mentoring developers, reviewing code, and providing technical guidance
- Collaborated directly with business stakeholders during requirement gathering, UAT, production deployments, and issue resolution for enterprise applications

EDUCATION

Bachelor of Engineering (B.E.), Information Science & Engineering — Aug 2019 - May 2023

Atria Institute of Technology, Bengaluru (VTU) — CGPA: 8
